

COOPER FLUID SYSTEMS HAVE DEVELOPED A RANGE OF MODIFIED SHIPPING CONTAINERS DESIGNED TO MEET RE-LOCATABLE LUBRICANT STORAGE AND DISPENSING REQUIREMENTS.

Pod heating available for winter temperatures

Fully bunded

Completely custom designed, our containers are the complete solution for storage and dispensing industrial fluids at the workshop or worksite. Based around 20 or 40 foot containers and heavily modified for safety and durability, up to 10 fluids can be dispensed from 20 IBS's (40ft high cube). Dispense from one pod while the empty is changed out.

Available as completely stand alone with gensets or as supply only variants
