Hydra-Pac Waste Management Solutions

Sustainable Solutions for Modern Waste Challenges

Cooper Fluid Systems offers Hydra-Pac waste management equipment, providing complete turnkey solutions for waste reduction, recycling, and resource recovery. From standard products to custom-built solutions, our Australian-made machinery is designed for durability and engineered to meet your specific requirements.

94% of retail waste is packaging materials like paper, cardboard, and plastic, almost all of which can be recycled. Let us help you take control of your waste management approach while saving money.

Cooper Fluid Systems provides complete waste management solutions with Hydra-Pac, from design through installation and ongoing service.

Choose Hydra-Pac for Australian-made machinery tailored to your requirements. Built with safety as the highest priority and backed by our national service network, our solutions reduce waste collection costs while increasing recycling revenue, benefiting both your business and the environment.

The Cooper Fluid Systems extensive team of mechanical and electrical engineers and service technicians, provide complete support throughout the entire project lifecycle.

Our comprehensive services include custom design and fabrication, factory acceptance testing, installation and commissioning and operator training. We continue our partnership with scheduled maintenance, breakdown support, and spare parts supply to ensure your equipment operates at peak efficiency.

As we often say, "There are two aspects to waste recycling – first, doing the right thing and secondly, cost recovery."

Contact Cooper Fluid Systems today to discover how Hydra-Pac can transform your waste management approach.

Hydra-Pac Benefits

- REDUCE YOUR WASTE VOLUME BY UP TO 90%
- DECREASE TRANSPORTATION COSTS WITH HIGHER DENSITY WASTE
- CREATE VALUABLE RECYCLING REVENUE STREAMS
